About

I am Ammar Hadee Farman from Iraq, Diyala Governorate. I entered the field of computers, especially programming in the year 2013, and later I specialized in backend under the Django framework , And later it became Full Stack Web Developer .

Education

I have a diploma in computers at the Technical Institute of Baquba, as well as a bachelor's degree in Computer Science at Al-Mustansiriya University

Experience

So far, I have not worked in companies because I was studying at the university, but I have nearly two and a half years experience in programming websites and one of the most recent work that I have done is:

My business is up on GitHub
